## Edward Jones Prior Authorization Programs

To protect patient safety, some extra steps might be required to fill a prescription for a drug listed below. The purpose of these requirements is to ensure that drugs prescribed for certain conditions are the appropriate choice, dose and quantity. Express Scripts will review your prescription history and can identify potential drug interactions and other safety concerns that your doctor may not be aware of.

Note: As new drugs become available in the marketplace, rules are automatically updated; therefore specific drugs under each category are subject to change.

### How Authorization Works

**Through Mail Service Pharmacy:** Express Scripts will contact your doctor directly to obtain the necessary clinical information.

**Through Retail Pharmacy:** If you submit a prescription for a drug that has a coverage requirement under one of the programs below, your pharmacist will notify you. If additional information is required from your doctor, the pharmacist will give you or your doctor the toll-free Express Scripts clinical review phone number.

Please note: It may take up to two business days for Express Scripts and your doctor to discuss your situation. If the request is approved, you will be notified by phone and written notification will be sent to your doctor. If you can't be reached by phone, written notification will be sent. If the request is denied or the quantity is reduced, written notification will be sent to you and your doctor. The written notification describes the decision and also provides instructions for filing an appeal to Express Scripts.
