Edward Jones Drug Quantity Management

To protect patient safety, some extra steps might be required to fill a prescription if the drug is listed below. The purpose of these requirements is to ensure that drugs prescribed for certain conditions are the appropriate dose and quantity. Express Scripts will review your prescription history and can identify potential drug interactions and other safety concerns that your doctor may not be aware of.

Note: As new drugs become available in the marketplace, rules are automatically updated; therefore this list is subject to change.

The following drug classes are subject to quantity and dose review. If the prescription exceeds the program's maximum-allowed quantity, your doctor will need to submit a coverage review and obtain prior authorization. Drugs in this review include:

MODULE	MEDICATION	MODULE	MEDICATION	MODULE	MEDICATION
